

GEEK YOUR TEACHING!

Hands On: Learn How to Build and Publish a Free Website and Blog for Your Classroom or Your Lesson Plans!

This workshop is for the person (digital immigrant) who wants to learn how to use a simple, drag and drop, free, web-based tool to design a dynamic website and blog. No technical skills required and you won't have to learn HTML or CSS coding.

From history to biology, no matter what subject you teach, you will leave this workshop with the start of a free, fully functional, live website you can continue to build on any computer with web access.

When: Monday, June 28, 2010 8:00 a.m. – Noon

Where: Marquette University Raynor Library, Room 320H

You will learn how to:

- set up a professional looking website and blog by picking from dozens of professional designs you can customize to make your own
- add pages and elements to organize your site
- integrate text and images
- create active internal and external hyperlinks to other relative web-based content
- embed content from other sites like YouTube
- integrate features that allow you to have open or closed conversations with your colleagues or students

What to Bring:

To make this workshop individually valuable, we have prepared a list of content related items to bring so you can actually begin building your own site. While our lab is equipped with laptops for you to use, you are welcome to bring your own personal laptop to work on.

Please have accessible on your laptop or an external flash drive or CD the following:

- 10-12 photographs or other types of images in .jpg format
- text in Microsoft Word .doc format we can cut and paste to integrate into your site

To Register: Visit <http://gmcec.com/eventregistration.html>

Cost: \$25 (includes breakfast and supporting materials)

Questions: Call Jennifer Maney at 414-288-4573
